

Solutions for electrical safety test systems

A 1627 Connection box 3-phase

Diversity of electronic products, which need to be tested, present a many challenges for the manufacturers. Different sizes, shapes and configurations of electronic devices make it challenging for electrical safety examination. Due to these facts Metrel has developed different types of connection boxes, which can be easily adopted to customer's needs.

Solutions for electrical safety test systems

The A 1627 connection box is a passive device that acts as a connection interface between the CE SWITCH 5 kV and the tested equipment. It is intended for connection of various 1- and 3-phase appliances to A 1600 CE SWITCH 5 kV. Equipment with supply cord, equipment intended for fixed installation, electronic subassemblies can be tested. Connections for connection to isolated conductive parts and earthed parts are added. The connection box is coded in order to prevent from applying a too high test voltage to its outputs.

KEY FEATURES

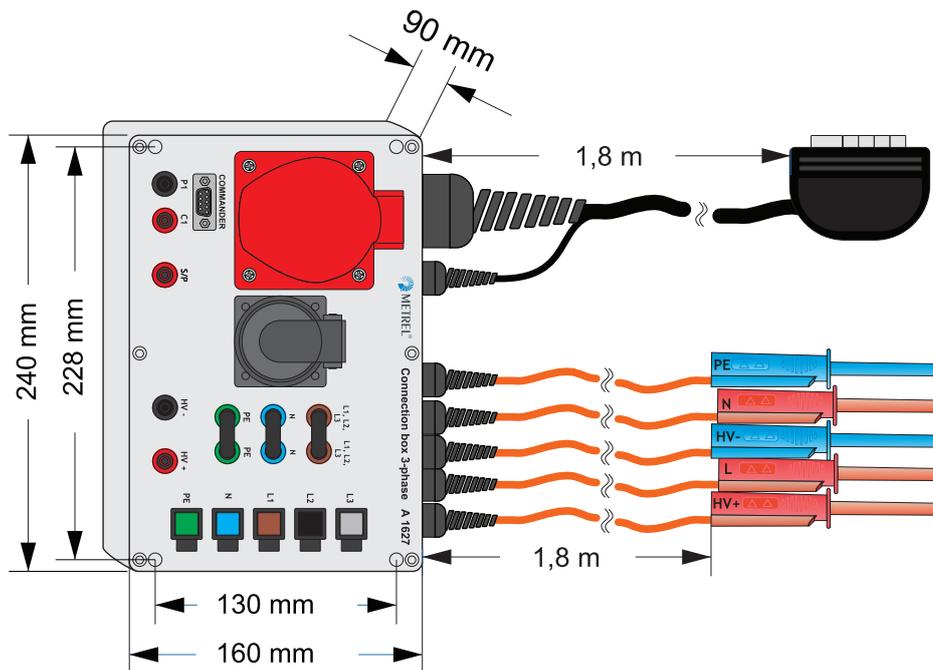

- Adjustable to country-specific sockets;
- Terminals for connection of remote tip commander (for execution of Earth continuity test);
- Quick release terminals for connection of devices without plugs;
- Robust and durable construction;
- Ready for integration into different test cages.

STANDARDS

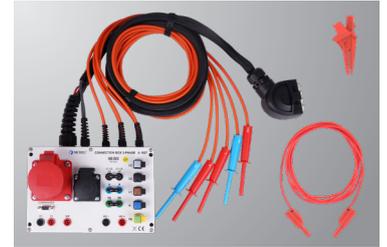

- Safety**
- EN 50191

TECHNICAL SPECIFICATION

Measuring function	Notes
Continuity	up to 25 A
Insulation	up to 1000 V dc
Leakage	*
Power	up to 16 A-1phase
Discharge time	*
HV / HV programmable	Up to 4 kV AC/DC
General	
Weight	1,8 kg
Fastening screws	M4 x 12 DIN 912, 4 pcs
Dimensions	

ORDERING INFORMATION

Standard set A 1627

- A 1627 Connection box, 3-phase
- A 1710 Test lead, red, 1,5 m
- A 1064 Crocodile clip, red

OPTIONAL ACCESSORIES

Photo	Order No.	Acc. description
	A 1511 2M5	Tip Commander, 2,5 m
	A 1511 5M	Tip Commander, 5 m
	A 1511 10M	Tip Commander, 10 m
	A 1047	HV test lead, red, 2 m
	A 1048	HV test lead, black, 2 m
